[8 Sign Language Apps](#)

# Made for Hearing Aid Apps

These apps act as a remote control for your hearing aids. They are specific for each hearing aid brand and must be used with a compatible hearing aid model.

Brand	App Name	Description	Availability
Signia	<a href="#">miniTek Remote App</a>	This Android app acts as a remote control for your Siemens miniTek device and allows the user to control several wirelessly synced audio devices with their hearing aids. The app will allow you to control them seamlessly and discreetly.	Android, iOS
Signia	<a href="#">touchControl</a>	A remote control that works with Siemens wireless hearing aids. Change your hearing aid programs, adjust volume, and adjust bass and treble sounds with the app alone.	Android, iOS
Phonak	<a href="#">Support App</a>	It's like a virtual assistant for your hearing aids, this app will walk you step-by-step through the process of using your hearing aids. It includes step-by-step instructions and a troubleshooting guide to get you comfortable using your devices.	Android, iOS
Phonak	<a href="#">RemoteControl App</a>	Works along with the Phonak Compilot devices to customize your hearing aid settings and configure its wireless streaming functions.	Android, iOS
Starkey	<a href="#">TruLink</a>	This app is the ultimate controller of Starkey's newest Made for iPhone (and now Android) hearing aids. It allows complete control over your Starkey Halo hearing aids without any intermediary device.	Android, iOS
Beltone	<a href="#">HearPlus</a>	Use this app with your compatible Beltone hearing aids to adjust volume, settings, programs, and check battery status.	Android, iOS
ReSound	<a href="#">Smart</a>	This app allows you to fine-tune your ReSound Smart hearing aids without any intermediary device. Change programs, volume, access the virtual user's guide, find misplaced hearing aids, balance sounds, and seamlessly sync with other audio devices with the app.	Android, iOS

Brand	App Name	Description	Availability
ReSound	<a href="#">Control</a>	An app that works with ReSound's wireless hearing aids to adjust programs, volume, and control your other ReSound streaming devices.	Android, iOS
Oticon	<a href="#">ConnectLine</a>	Control your wireless streaming settings for your Oticon hearing aids.	Android, iOS
Oticon	<a href="#">ON app</a>	Use this app to control your Oticon Opn hearing aids without the need for an intermediary device. Change programs, volume, access the virtual user's guide, find misplaced hearing aids, check battery level, and sync with IFTTT.	Android, iOS

## Hearing Protection Apps

These apps measure the sound level in your environment or from your streaming device and can tell you when you are being exposed to damaging noise levels.

App Name	Description	Availability
<a href="#">Sound Meter</a>	Uses the microphone from your Android device to measure how loud your environment is, in decibels, and gives you a reference sound to compare it to.	Android
<a href="#">Sound Level Meter</a>	Uses the microphone from your iOS device to measure how loud the environment is, in decibels.	iOS
<a href="#">Wide Noise</a>	See where the noise pollution is occurring in the world and monitor your exposure level.	Android, iOS
<a href="#">Noise Control Pro</a>	Uses the microphone from your Android device to measure how loud your environment is, in decibels, and allows you to record the sound for later playback.	Android
<a href="#">Soundcheck</a>	Measures the noise levels in your environment and determines whether noise protection is recommended to protect your hearing from damage.	Android, iOS
<a href="#">Hearangel</a>	Monitors the music levels you are listening to with your audio devices and lets you know when you are in danger of overexposure.	Android, iOS
<a href="#">Too Noisy Pro</a>	Used to control the noise level in a classroom by alerting the kids when they are being too noisy.	Android, iOS
<a href="#">Hearcules</a>	For people who are frequently exposed to loud noises, this app will tell you how much longer you can stay in that noisy environment without causing	iOS

App Name	Description	Availability
	hearing damage, and will alert you when you need to take a break from the noise.	
<a href="#">Adv Decibel Meter 2.0</a>	Measures the audio power coming into your device's microphones.	iOS
<a href="#">Decibel Meter Pro</a>	A decibel meter with graphics optimized for the iPhone.	iOS

A [recent evaluation](#) shows that some of the apps available on iOS may be considered accurate and reliable enough to assess occupational noise exposure.

## Tinnitus Relief Apps

These apps will provide different types of therapy sounds to use for tinnitus relief. Some of these apps also include additional relaxation and sleep techniques for managing tinnitus.

App Name	Description	Availability
<a href="#">Relax Melodies</a>	Select sounds and melodies and combine them to create your own mix to help you sleep.	Android, iOS
<a href="#">Relax Noise 3</a>	Uses white, pink, or red noise to mask your tinnitus.	Android
<a href="#">Tinnitus Balance App</a>	Create customized sounds and music to listen to when your tinnitus is most bothersome.	Android, iOS
<a href="#">Tinnitus</a>	Uses the Tinnitus Retraining Therapy (TRT) method to habituate your mind to "tune out" the tinnitus.	Android
<a href="#">StopTinnitus</a>	Creates a customized tone to "phase out" your tinnitus.	Android, iOS
<a href="#">Tinnitus: The Cure</a>	An informational app that will help you learn about your tinnitus diagnosis and what you need to understand to overcome the disease.	Android
<a href="#">White Noise</a>	Uses environmental sounds to create a relaxing atmosphere.	Android, iOS
<a href="#">Tinnitus Relief</a>	This app gives you information about tinnitus and walks you through different relaxation exercises to give you tinnitus relief.	Android

App Name	Description	Availability
<a href="#">ReSound Relief</a>	Offers a combination of sound therapy and relaxation exercises to distract you from your tinnitus.	Android, iOS
<a href="#">Beltone Tinnitus Calmer</a>	Offers a combination of sound therapy and relaxation exercises to distract you from your tinnitus.	Android, iOS
<a href="#">SimplyNoise</a>	Features white, noise, and brown sound samples to help reduce tinnitus and stress.	Android, iOS
<a href="#">myNoise</a>	Uses white noise, rain noise and binaural beats to create sound therapy noise generators.	Android, iOS
<a href="#">Tinnitus Therapy</a>	Uses customizable sounds as sound therapy and sound masking to make your tinnitus less noticeable.	Android, iOS
<a href="#">Whist</a>	Create custom sounds by adjusting volume, pitch, noisiness, and balance to help relieve your tinnitus.	Android, iOS
<a href="#">Oticon Tinnitus Sound</a>	Choose from different sound types and create a sound plan to give your relief from your tinnitus when you need it.	Android, iOS
<a href="#">Track Your Tinnitus</a>	This app helps you to track your tinnitus so you can find patterns and figure out how your tinnitus is associated with your daily activities.	Android, iOS
<a href="#">Hear &amp; Tinnitus</a>	Use masked and modulated sounds as a sound therapy for your tinnitus.	Android, iOS
<a href="#">Tinnitus Alleviator</a>	Users of this app listen to spectrally modified music designed to retrain the brain to ignore the ringing sounds and stop reacting negatively to them.	iOS
<a href="#">Tinnitracks</a>	Web app which allows you to filter your music in order to use it for a new tinnitus therapy	Android, iOS

## Hearing Test Apps

These apps will help you to screen your hearing and estimate how much hearing loss you may have.

App Name	Description	Availability
<a href="#">Play it Down</a>	Play one of your favorite songs and find out what it sounds like to those 5, 10, 20, or 30 years older than you. Compare your hearing to your friends and family and see who can hear best.	Android, iOS

App Name	Description	Availability
<a href="#">uHear</a>	Give yourself a hearing test to determine if you hear within the normal range and how well you hear in noise.	iOS
<a href="#">Siemens Hearing Test</a>	Determine how well you can detect words in background noise.	iOS
<a href="#">Hearing Test Pro Free</a>	Tests your hearing in quiet and in noise and explains the results to you using your audiogram.	iOS
<a href="#">Better Hearing</a>	Analyzes your hearing to determine at which frequencies you can't hear.	iOS
<a href="#">Soundcheck</a>	Screen your hearing and view your results in an easy-to-read format.	iOS
<a href="#">Hearing-Check</a>	A quick and simple way to screen your hearing by entering the number you hear.	iOS
<a href="#">Mimi Hearing Test</a>	Test your hearing at different frequencies and determine your "hearing age."	Android, iOS
<a href="#">Audicus Hearing Test</a>	A quick and simple hearing screening at 6 different frequencies.	iOS
<a href="#">Tone Generator</a>	Create your own frequency tones and compare your hearing with your friends.	iOS
<a href="#">Jacoti Hearing Center</a>	Uses patented DuoTone technology to provide you with clinically reliable test results that you can track over time.	iOS
<a href="#">Sound Scout</a>	A game designed to test the hearing of children.	Android, iOS

## Hearing Enhancement Apps

These apps use sound and/or speech amplification technology to help make listening easier without the use of traditional hearing aids.

App Name	Description	Availability
<a href="#">Jacoti ListenApp</a>	use your Apple earphones to hear voices around you clearer and the sound from applications like music players, podcast applications, voice over ip systems, etc.	iOS
<a href="#">HearYouNow</a>	A personal sound amplifier that can be adjusted individually for each ear.	iOS

App Name	Description	Availability
<a href="#">i-Hear Free</a>	A personal sound amplifier that turns up the volume.	iOS
<a href="#">Hearing Aid</a>	Records a conversation and filters out ambient background noises based on voice frequency.	iOS
<a href="#">EarMachine</a>	Enhances the sounds around you.	Android, iOS
<a href="#">TV Louder</a>	Uses the device microphone to amplify TV sounds without having to turn the TV up.	iOS
<a href="#">HearingAmp</a>	This app will amplify sounds and allow the user to adjust sound quality with varying filters.	iOS
<a href="#">BioAid</a>	Choose from different settings based on common hearing impairment configurations to find the amplification that works for you.	iOS
<a href="#">AUD1</a>	Uses advanced signal processing strategies to help increase comfort and clarity of sounds.	Android, iOS
<a href="#">Hear Coach</a>	A training game used to improve listening ability in noise by increasing cognitive and auditory sharpness.	Android
<a href="#">uSound</a>	Uses your hearing test to customize sounds to each user's specific hearing level in real time to compensate for any impairment.	Android
<a href="#">Petralex Hearing Aid</a>	Enhances incoming sounds and allows the user to create different profiles.	Android, iOS
<a href="#">Tunity</a>	Allows you to stream sound from any muted television.	Android, iOS

## Assistive Device Apps

These apps help those with hearing loss by providing visual and/or tactile information such as closed captioning and vibrational alerting signals.

App Name	Description	Availability
<a href="#">Tap Tap</a>	Works as an alerting device to get the attention of someone with a hearing loss by vibrating in response to certain sound signals, such as a honk, alarm, or shout.	iOS
<a href="#">Captionfish</a>	Shows you a list of all the movie theaters and showtimes where closed captioning services are available in your area.	iOS/Android

App Name	Description	Availability
<a href="#">P3 Mobile</a>	A voice relay service app that allows deaf and hard of hearing individuals to have telephone conversations.	iOS/Android
<a href="#">Sound Alert</a>	Turns your smartphone into an alerting device. This app will monitor your environment and send you a visual or vibration to ensure safety, comfort, and security.	iOS/Android
<a href="#">Connect</a>	helps those who are deaf and hard of hearing to detect dangerous sounds, communicate with people, make calls in case of emergency...and dance	iOS/Android

## Hearing Loss Simulation Apps

These apps will give you a better understanding of hearing loss and the types of difficulties someone with hearing loss may experience.

App Name	Description	Availability
<a href="#">Hearing Loss Simulator</a>	Allows you to choose a specific hearing loss configuration and listen to sounds as though you have that particular hearing loss.	iOS

## Ear Education Apps

These apps will help educate you on the anatomy of the ear and conditions which may cause hearing loss.

App Name	Description	Availability
<a href="#">Ear ID</a>	Teaches the anatomy of the ear with images, animation, and videos.	iOS
<a href="#">DrawMD ENT</a>	Allows medical professionals to sketch medical illustrations to help better explain a condition to their patient.	iOS
<a href="#">LUMA Audiology</a>	An informational app that helps Audiologists explain hearing and balance conditions to their patients with easy-to-understand videos, simulations, and closed captions.	iOS
<a href="#">Phonak Leo</a>	This interactive iPad app is great for teaching children about hearing loss in a fun way.	iOS

# Sign Language Apps

These apps will help you learn or interpret sign language.

App Name	Description	Availability
<a href="#">ASL Dictionary</a>	Translates English into American Sign Language (ASL) from A-Z, numbers, common English phrases, symbols and more.	iOS
<a href="#">ASL Dictionary from NTID</a>	An ASL to English dictionary that demonstrates how signs change, or "inflect" to convey different meanings.	iOS
<a href="#">Signed Stories</a>	Children's stories performed in American Sign Language or British Sign Language.	iOS
<a href="#">My Smart Hands Baby Sign Language Dictionary</a>	Teaches you and your baby 300 different ASL signs.	iOS
<a href="#">ASL Coach</a>	A simplified way to learn American Sign Language.	iOS
<a href="#">ASL: Fingerspelling</a>	An ASL fingerspelling practice tool to help you improve your ability to read fingerspelling.	iOS
<a href="#">Marlee Signs</a>	Learn ASL from Marlee Matlin, Academy Award Winning Deaf actress.	iOS
